Dear Sirs,

Reference your recent unidentified observations of 11 June 1966.  
The information in your letter was not sufficient for evaluation.  
Request you complete the attached FTD Forms 164 and return them  
in the envelope provided.

Also enclosed for your information is a copy of the brochure on  
Project Blue Book which describes the program to date.

We wish to thank you for your interest in unidentified flying  
objects.

Sincerely,

  
HECTOR QUINTANILLA, JR, Major, USAF  
Chief, Project Blue Book

Air Force Department  
Committee on U.F.O.s  
Pentagon Building  
Washington, D.C.

Dear Sirs:

On the night of June  
11, 1966, at approximately  
10:30 P.M. three friends and  
I saw an object much like  
a star going across the sky.  
At first we thought it may  
have been a satellite, but  
we all knew a satellite was  
fixed in one orbit. However,  
after close observation, we  
noticed that this object  
could not have been a  
satellite. The object made  
three ninety-degree turns  
in less than 20 minutes.

Send 1/64

( It travelled at various speeds, sometimes slowing up, speeding up faster, and even stopping for approximately three to four minutes before the last ninety-degree turn. After this three-to-four minute stop, the object shot in to outer space almost faster than what we could blink our eyes. This speed was such that it was faster than any of us had ever seen. A pattern of the object's course is enclosed on a following page.

How do you explain this object? Also, we would like as much information on U.F.O.'s as you could possibly give us.

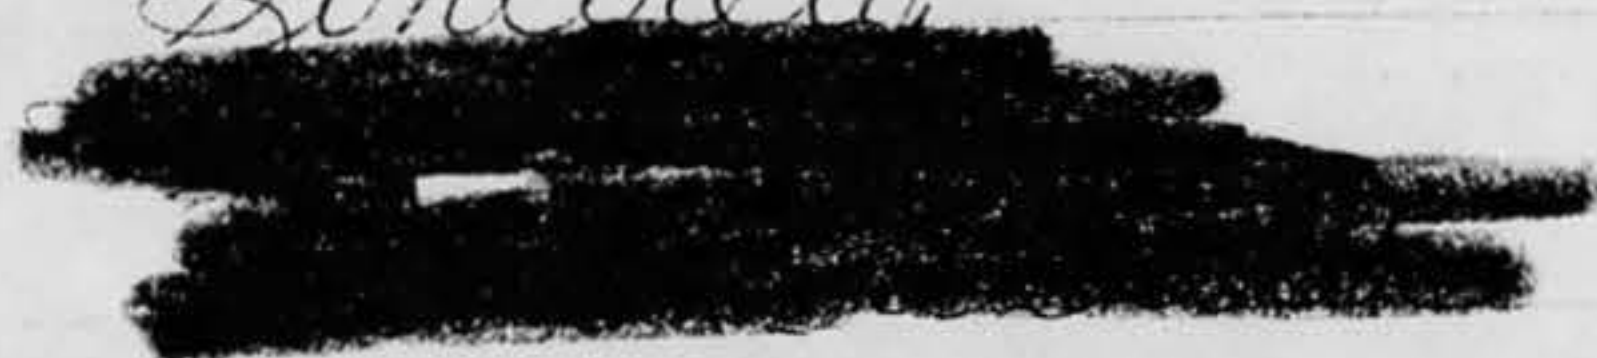

The four of us graduated from High School and we don't think all of us could having been "seeing things". Two of the four graduated

( with honors from high  
school. So, we think we  
did see something, and not  
did we write this letter  
as a joke.

Thank you!

Sincerely,

P.S. It was a crystal clear  
night
